

Dynamic Form

Dynamic Card Builder is a configurable card issuance platform that manages the full lifecycle of secure card production from data capture and verification to multi-level authorization and secure card design, ensuring controlled, compliant, and efficient issuance operations.

- Dynamic data entry form configuration
- Flexible data verification (manual, file, database integration)
- Multi-step authorization workflow
- Automated approval notifications
- Audit trail and lifecycle tracking
- Smart card configuration (contact, contactless, dual-interface)
- Configurable card materials (PVC, PET, PC)
- Secure card printing and production control

The screenshot displays the 'Card Builder' web application interface. At the top, there is a navigation bar with links for 'Home', 'Users', 'Forms', and 'Cards', along with a user profile 'AS Arana S.' and a notification bell. The main heading is 'Create New Configuration'. Below this, a workflow diagram shows four steps: 'Data' (highlighted in blue), 'Verification', 'Authorization', and 'Cards'. The 'Data' step is expanded, showing a form with three fields: 'Configuration Name' (with the value 'Employee Onboarding'), 'Status' (a dropdown menu set to 'Active'), and 'Description' (a text input field with the placeholder 'Description...'). Below the form is a 'Fields List' table with columns: 'Label', 'Type', 'Data Type', 'Length', 'Required', and 'Actions'. The table contains four rows: 'Employee Name' (Text, string, 50, Required), 'Employee Position' (Textarea, string, 255, Not required), 'Employee ID' (Number, integer, 10, Required), and 'Hire Date' (Date, date, 10, Required). Each row has a checkbox in the 'Label' column and icons for copy and delete in the 'Actions' column. Below the table is a '+ Add Field' button. To the right of the table is a 'Field Properties' sidebar for the selected 'Employee Name' field, showing 'Field Label' (Employee Name), 'Field Type' (Text), 'Data Type' (String), 'Length' (50), and a checked 'Required' checkbox.

Label	Type	Data Type	Length	Required	Actions
☒ Employee Name	Text	string	50	Required	
☐ Employee Position	Textarea	string	255	Not required	
☐ Employee ID	Number	integer	10	Required	
☐ Hire Date	Date	date	10	Required
