

Green Zone App

Green Zone is a robust Android solution for high-precision biometric data acquisition. Optimized for IDEMIA (Morpho) devices, it leverages modern mobile technologies to provide a secure and user-friendly interface for fingerprint capture and processing.

Fingerprint Acquisition: Supports slap (4-4-2) and individual fingerprint capture using supported IDEMIA scanners.

Hardware Integration: Direct integration with the MorphoKit SDK for device communication.

Modern UI: Built entirely with Jetpack Compose for a reactive and consistent user interface.

Data Management:

- Local storage using Room Database.
- Preferences management via DataStore.
- Network Sync: Data transmission utilizing Retrofit and OkHttp.
