🐙 saidelgnaidy@github

Mobile Developer and Team Leader with over 6 years of experience in designing and building advanced mobile applications using Flutter, Dart, and native Android (Kotlin, Java, Jetpack Compose). Expert in integrating complex hardware systems including BLE, NFC (MIFARE, DESFire), biometric devices, POS systems, and fingerprint tablets. Deep understanding of AI-enhanced systems such as face recognition and OCR for eKYC. Strong background in scalable architecture, performance optimization, team mentoring, and agile methodologies.

🎯 Technical Skills

- **Languages & Platforms:** Dart, Kotlin, Java, Swift (basic), Flutter, Android SDK, Jetpack Compose.
- **Device Integration:** BLE, NFC (MIFARE, DESFire), Biometric Devices, POS, Fingerprint Tablets Attendance Systems
- **AI & Computer Vision:** Face Recognition, OCR (Tesseract, AI-trained models), eKYC verification
- **SDKs & APIs:** Morpho SDK, Custom device SDKs, RESTful APIs, Firebase.
- **Tools & DevOps:** CI/CD, Git Actions, ShoreBird, Mason, Firebase Hosting.
- **Architecture & Patterns:** MVVM, Clean Architecture,
- **State Management:** Bloc, GetX, Provider
- **API & Networking:** Dio, Http, Socket.io, Swagger
- **Google Maps:** Tracking, Polylines, Places
- **Team Leadership:** Agile, Jira, Mentoring, Code reviews

📁 Recent Experience

Arana Security

Mobile Developer & Technical Lead

Egypt | Sep 2023 – Present

Projects : [Play Store](#) [App Store](#)

- Led development of secure access and identity systems integrated with BLE, NFC (MIFARE/DESFire), biometric tablets, POS, and attendance hardware.
- Built eKYC modules incorporating face-matching and OCR using AI-trained datasets.
- Delivered mobile solutions for ID Screen & Morpho devices using custom SDKs.
- Developed native and Flutter apps for real-time biometric verification, secure facility access, and on-premise authentication.
- Coordinated firmware integration and SDK validation with hardware vendors.

ForAll.FA

Mobile Developer

Egypt | May 2021 – Jan 2022

Projects : [Play Store](#) [App Store](#)

- Architected 4 production apps (ForAll, Vendor, Sales, Driver) for shopping, ticketing, and healthcare.
- Implemented dynamic UI rendering modules, allowing field configuration from backend APIs.
- Integrated maps, tracking, and live chat via WebSocket (text, images, files, voice).
- Built reusable packages and tools like api_helper and multi_selection.

Smart Breeder – Egypt | Oct 2020 – Apr 2021

- Architected and developed the Smart Breeder app for livestock management including barns, feeds, medical tracking, and statistics.
- Delivered a smooth UX with beautiful animations and clean architecture.

Erad United – Egypt | Oct 2020 – Apr 2021

- Collaborated on apps such as Maa Allah, Ma3een, Sanai3i, The Business Square, and Harvest.
- Integrated Firebase, maps, and Provider state management for robust app performance.

Freelancing – Remote | Sep 2018 – Present

- Working with a talented team to develop and launch various mobile applications , including [Maa Allah](#) , [Ma3een](#) , [Sanai3i](#) , [The Business Square](#) , harvest ...

🎯 Technical Expertise

- **Flutter & Dart:** Advanced development, modular architecture, UI/UX refinement
- **State Management:** Bloc, GetX, Provider
- **API & Networking:** Dio, Http, Socket.io, Swagger
- **Google Maps:** Tracking, Polylines, Places

🎯 Soft Skills

- **Strong analytical and debugging skills**
- **Team leadership and mentoring**
- **Clean code advocate**
- **Agile & Scrum project contributor**
- **Strong communication and technical documentation**

🎓 Education

- Faculty of Computer and Information Systems at Zagazig University 2016 To 2020

🌐 Languages

- **Arabic:** Native
- **English:** Very Good

👤 Personal

- **Birthdate:** 5/5/1998
- **Graduation Year:** 2020
- **Military status:** Finished
- **Marital status:** Unmarried
